## DETAILED ACTION

### *Election/Restrictions*

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims 1-18, drawn to a light shield for a video screen panel, the light shield being formed as a collapsible structure comprising a flat roof having mutually opposing front and rear edges and mutually opposing inboard and outboard edges, and outboard side panel joined to the outboard side edge of the roof and foldable onto the roof into a collapsed condition and unfoldable to a deployed condition extending downwardly from the roof alongside the video screen, and a flat mounting strip extending from the rear edge of the roof rearwardly beyond the outboard side panel, classified in Class 359, subclass 601.
  - II. Claims 19-29, drawn to a glare shield for a camera viewfinder comprising a sheet of material of uniform thickness configured to form a pair of opposing, laterally projecting, forwardly and outwardly curved side wings and a shade canopy curved upwardly and forwardly and projecting above and between the side wings, whereby together the canopy and the side wings form a three dimensionally curved, concave forwardly, convex rearwardly facing light shielding structure, classified in Class 359, subclass 611.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions I and II are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown

Art Unit: 2872

to be separately usable. In the instant case, all of the subcombinations have separate utility in a combination without the particulars of the other subcombinations. See MPEP § 806.05(d).

3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

4. Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Group II, restriction for examination purposes as indicated is proper.

5. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

6. A telephone call was made to Charles H. Thomas (562-595-8422) on 4/21/05 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

7. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in

Art Unit: 2872

the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

8. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Arnel C. Lavarias whose telephone number is 571-272-2315. The examiner can normally be reached on M-F 9:30 AM - 6 PM EST.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Drew Dunn can be reached on 571-272-2312. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
